# What Shift builds, and who to sell it to

A catalogue of 25 real Shift builds for sales partners. Each one has a code, a status, the screens and the kind of business to show it to.

### Trade websites

# Find the code that fits the business in front of you

A builder tells you his website hasn't brought in a job all year. Turn to W01, show him the screens and read him the line under "Sell to". If he nods, log the lead in your Lead Engine login. Shift contacts him and you follow progress there.

### What the statuses mean

| | |
|---|---|
| **Live** | On the client's own web address and taking enquiries now. |
| **In use** | A system the client's team works in every day. |
| **Built** | Finished, and waiting on the client to launch. |
| **Demo** | A full working build with sample data, made to show prospects. |

### What owners say, and where to turn

| | |
|---|---|
| **W, L** | "My website's old and I never get anything from it." |
| **S01** | "When you search for what I do round here, my competitor comes up." |
| **C01, C05** | "Our leads are in WhatsApp, my inbox and three spreadsheets." |
| **C04, A02** | "Client admin and AML checks eat our Fridays." |
| **A01** | "Pricing a tender takes us a week." |

### House rules

- Every business name, logo and phone number on these screens is invented. Never name a real past client or send their link.
- There are no prices in this catalogue. Shift quotes after a discovery call.
- Never promise a Google ranking, an AI mention or a trading return. Point to the W06 result on page 12 instead.

Your Lead Engine login

Every lead you log shows its live status, from first call to signed project, along with the commission building on it. If you don't have a login yet, ask Jack.

# Trade websites

Roofers, groundworkers, plumbers, gas engineers, builders, bathroom fitters and suppliers. Several came to us from a template, Wix or WordPress site that looked like their competitors' and rarely made the phone ring. We rebuild it around their own photos and their own words, with the phone number as the easiest thing on the page to find.

### Every site comes with

| | |
|---|---|
| **Design** | Drawn up for that firm, using photos of their real jobs. |
| **Contact** | Phone number and quote button on every page, tap-to-call on mobile. |
| **Speed** | Plain, light pages with no heavy scripts, so they open fast on a phone. |
| **Search** | Set up for Google and the AI search tools from day one (S01). |
| **Moving** | An old web address moved across with its Google history kept and email left working. |

### Who to look for

A trade with a website more than three years old, a phone number you have to hunt for, a Facebook page doing a website's job, or a firm that has just renamed, bought another firm or added a service.

### Questions to open with

1. **When did your website last bring you a job?**
2. **If I search your trade and your town now, who comes up first?**
3. **When someone fills in your contact form, who sees it, and how fast?**
4. **Who can change your website today if you need to?**

# W01

## Roofing and construction firm

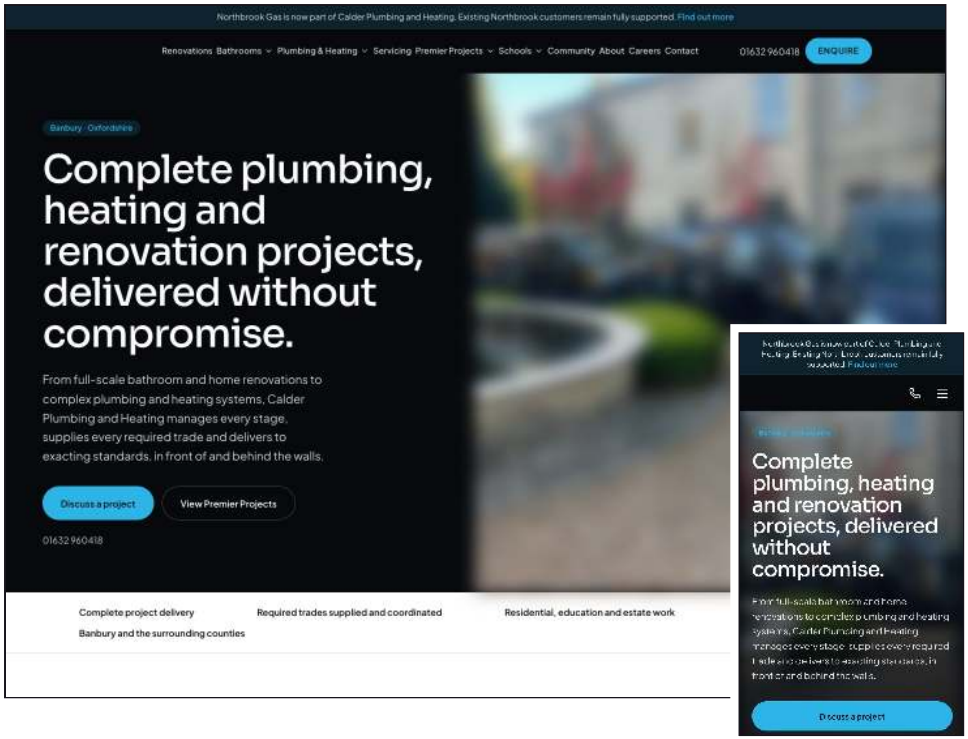

| | |
|---|---|
| Status | Live on the client's domain |
| Built | August 2026 |
| Where | Oxfordshire |

Two partners who moved from roofing into extensions, renovations and new builds. Their old one-page template only talked about roofs. The new site gives roofing and construction a page each, fills them with photos of their own jobs, and keeps the phone number and quote button in the header on every page.

| | |
|---|---|
| **Pages** | Home, roofing, construction, work, about and contact. |
| **Photos** | Their own finished roofs and builds, nothing from stock libraries. |
| **Contact** | Phone number and quote button in the header of every page, tap-to-call on mobile. |
| **Moved** | From a template one-pager to its own domain. |

Sell to

**Trades that have added a service their website still doesn't mention.**

# W03

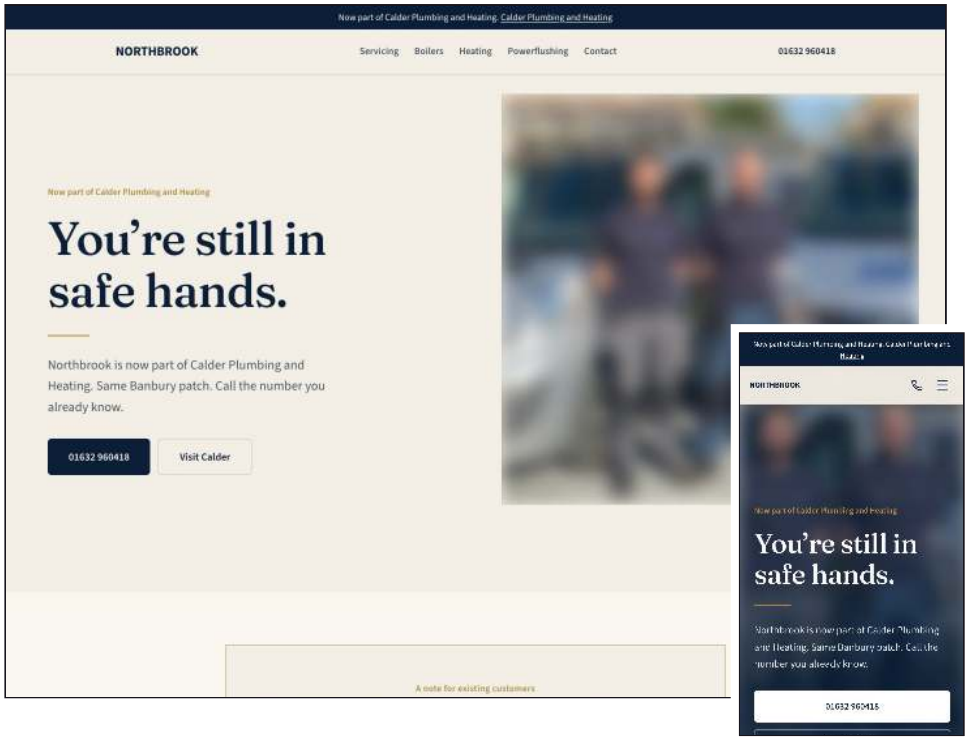

## Plumbing, heating and renovation company

| | |
|---|---|
| Status | Live on the client's domain |
| Built | August 2026 |
| Where | Oxfordshire |

Replaced an old WordPress site on the same web address, so its Google history carried over. Renovations, bathrooms, servicing and larger projects each get their own page.

Sell to

**Established plumbing and heating firms taking on bigger renovation work.**

# W04

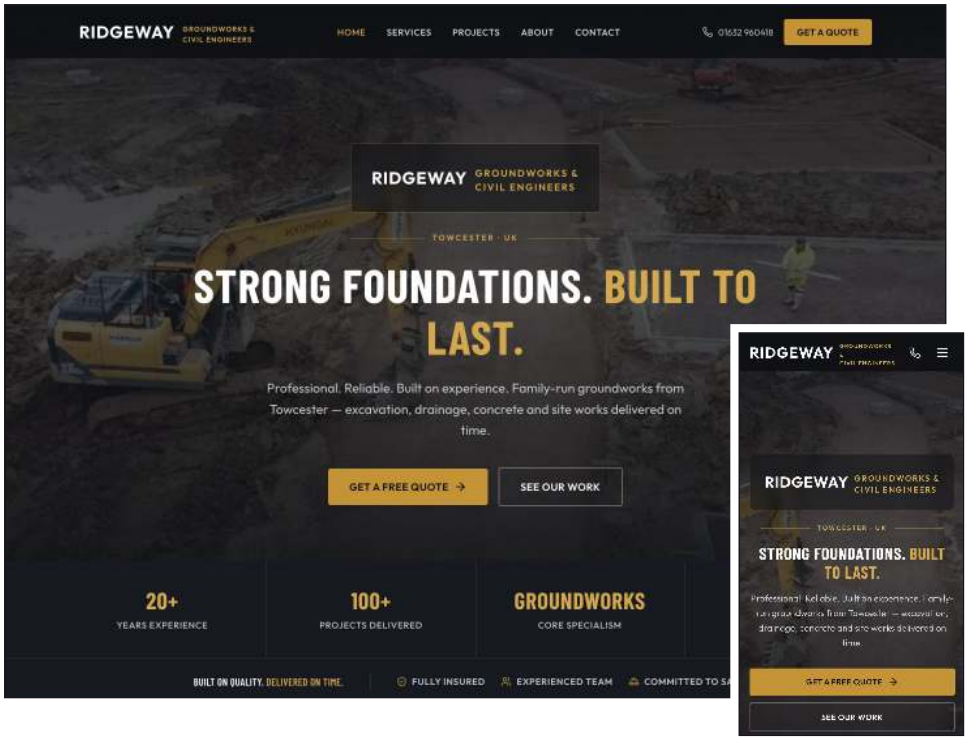

## Gas engineer after a takeover

| | |
|---|---|
| Status | Live on the client's domain |
| Built | August 2026 |
| Where | Oxfordshire |

When the firm in W03 bought a local gas specialist, we kept the old brand's site and address running. Old customers still find the number they know, and every page explains who looks after them now.

Sell to

**Any firm that has bought, merged with or renamed a business.**

# W02

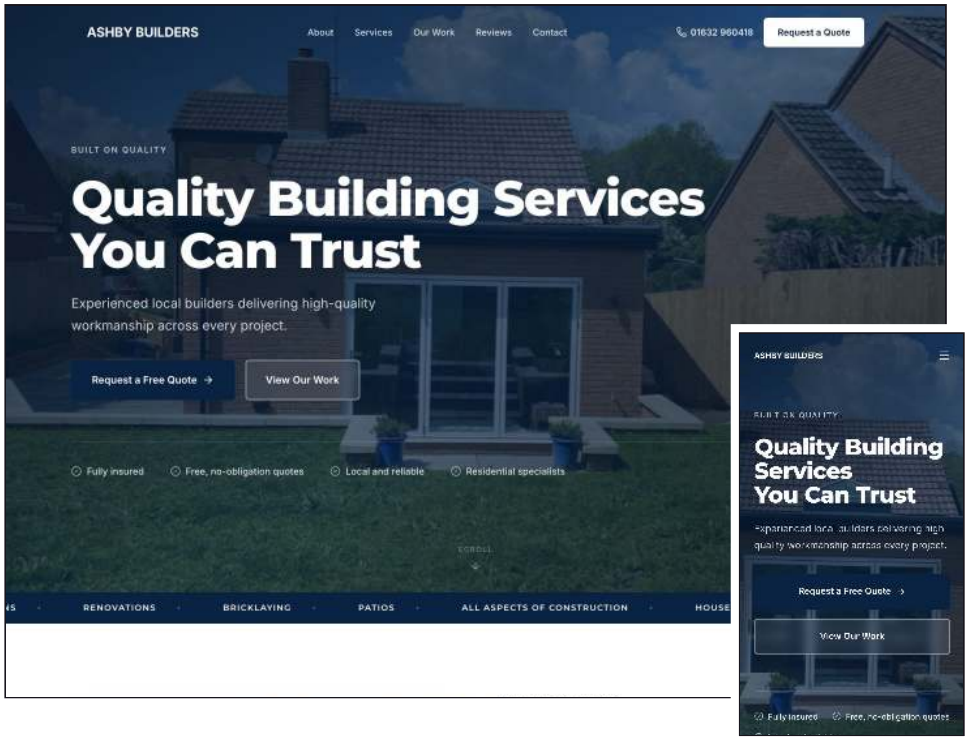

## Groundworks and civils contractor

| | |
|---|---|
| Status | Live on the client's domain |
| Built | August 2026 |
| Where | Northamptonshire |

A family firm doing excavation, drainage, concrete and site works. Services, a gallery of their own sites and a quote request.

Sell to

**Groundworkers, civils and plant hire firms who win work on reputation.**

# W05

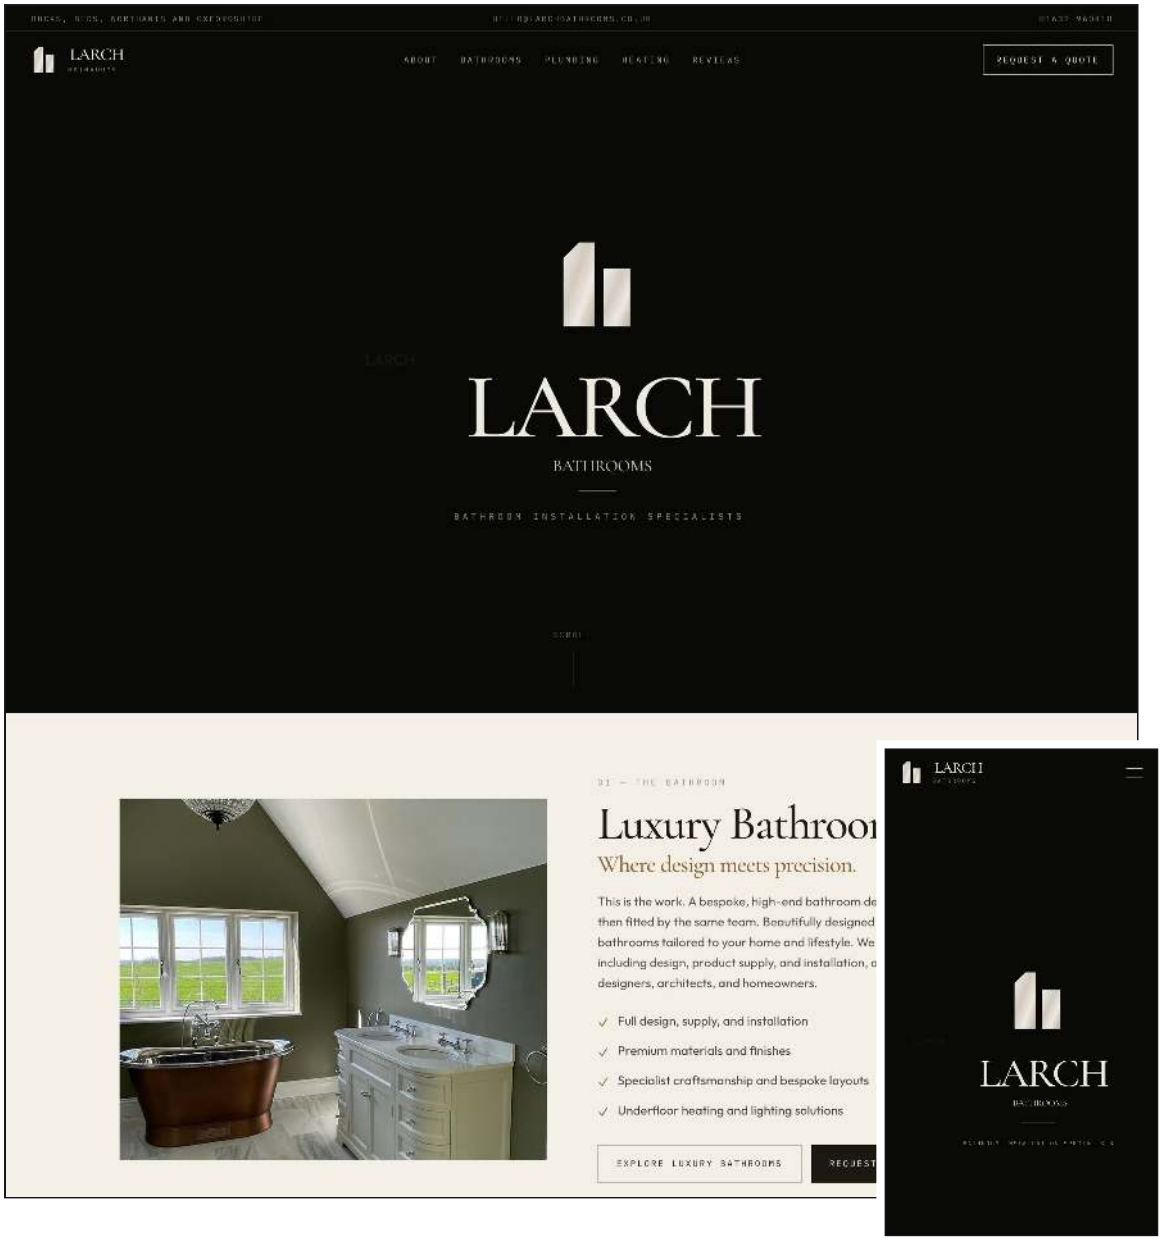

## Local building firm

| | |
|---|---|
| Status | Live on the client's domain |
| Built | June 2026 |
| Where | East Midlands |

Extensions, renovations and general building, with recent work, reviews and a free quote request on the first screen.

Sell to

**Small builders who get work by word of mouth and need somewhere to send people.**

# W06

## High-end bathroom installer

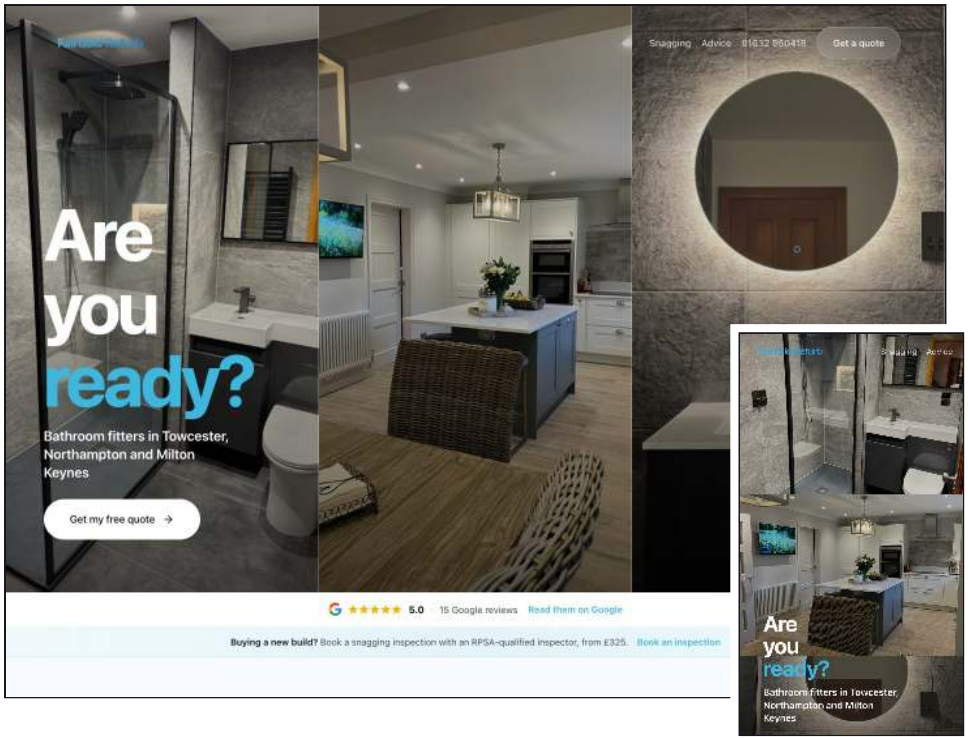

| | |
|---|---|
| Status | Live on the client's domain |
| Built | September 2026 |
| Where | Milton Keynes |

A dark, showroom-style site for a firm fitting luxury bathrooms, plus a Google Business Profile set up from scratch. In November 2026 the firm came first in Google's map results for its area, and Google's AI summary described it using the words from our site (see S01).

| | |
|---|---|
| **Pages** | Bathrooms, plumbing, heating and reviews, each with its own page. |
| **Google** | Business Profile set up with services, areas and photos. |
| **Result** | 1st in Google's map results from Milton Keynes, November 2026. |

Sell to

**High-end fitters, kitchen companies and installers who charge more than the competition.**

# W07

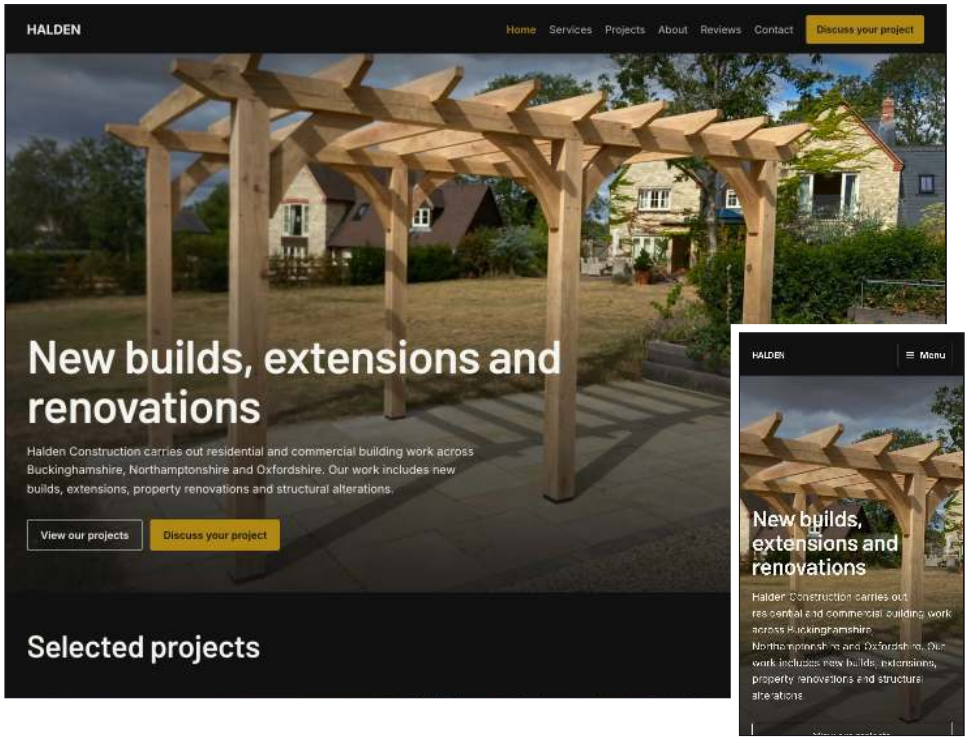

## Bathroom and refurbishment company

| | |
|---|---|
| Status | Live on the client's domain |
| Built | February 2026 |
| Where | Northamptonshire |

The first screen puts three of their own finished rooms side by side. Visitors see straight away that the firm also does kitchens, tiling, plastering and carpentry, all quoted as one fixed-price job.

Sell to

**Refurb firms whose customers think they only do one thing.**

# W08

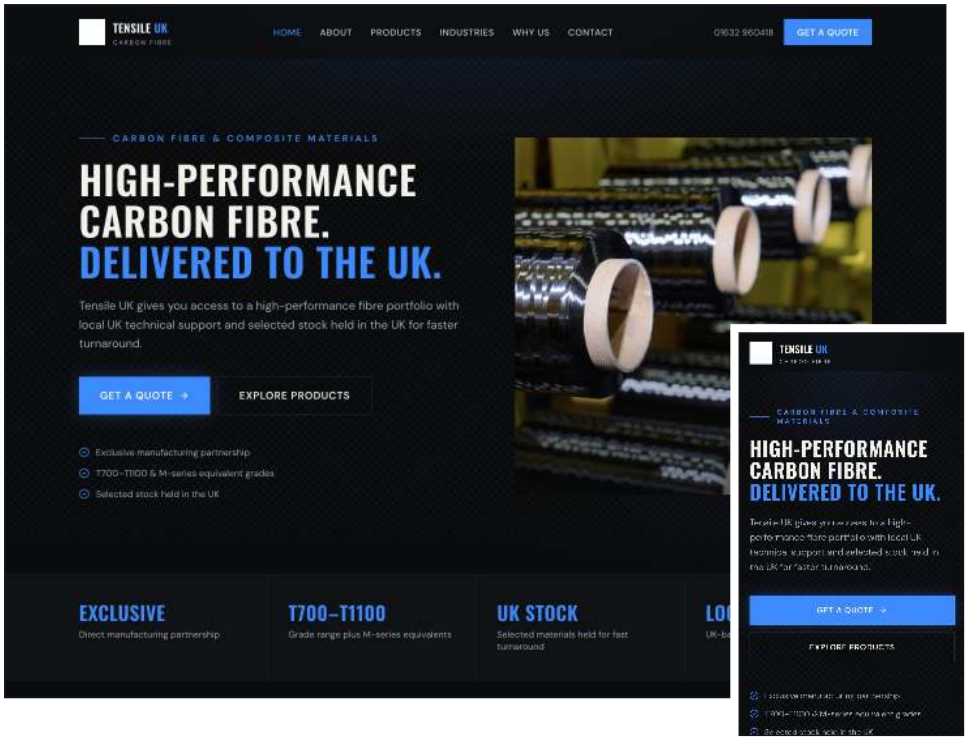

## Construction company

| | |
|---|---|
| Status | Built, waiting for the client to launch |
| Built | October 2026 |
| Where | Three counties |

New builds, extensions and renovations, built around the client's own project photos.

Sell to

**Construction firms pitching for larger private jobs, where the website is part of the pitch.**

# W09

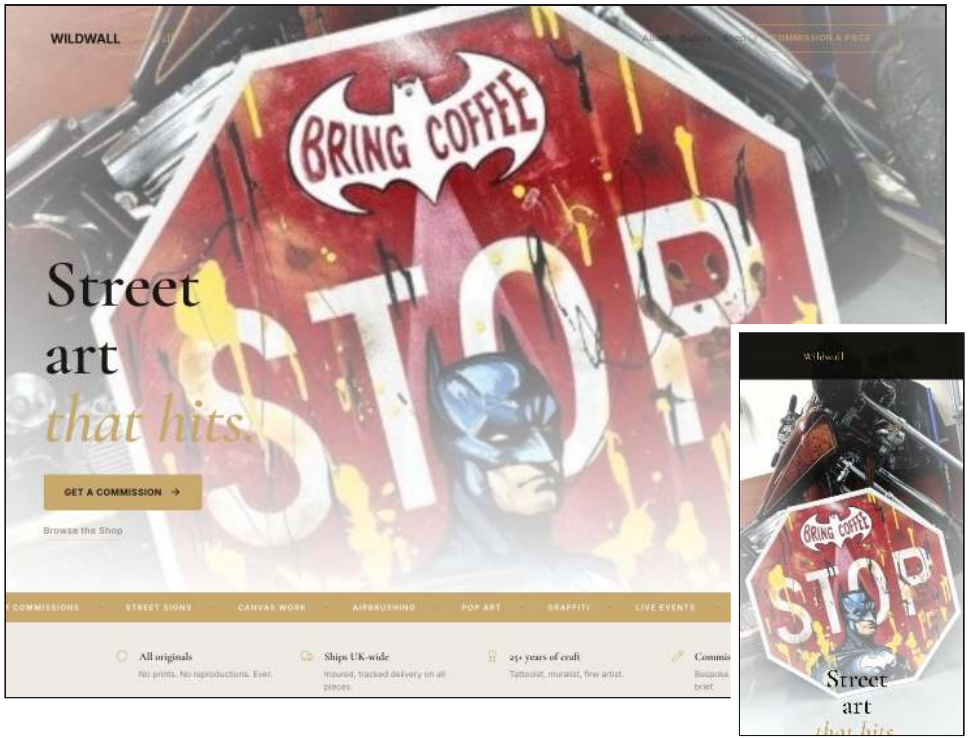

## Industrial materials supplier

| | |
|---|---|
| Status | Live on the client's domain |
| Built | July 2026 |
| Where | UK-wide |

A UK supplier of carbon fibre and composites with an exclusive manufacturing partner. Product ranges, industries served, UK stock and a quote request.

Sell to

**Suppliers, merchants and manufacturers whose website is a PDF catalogue with a contact page.**

# W10

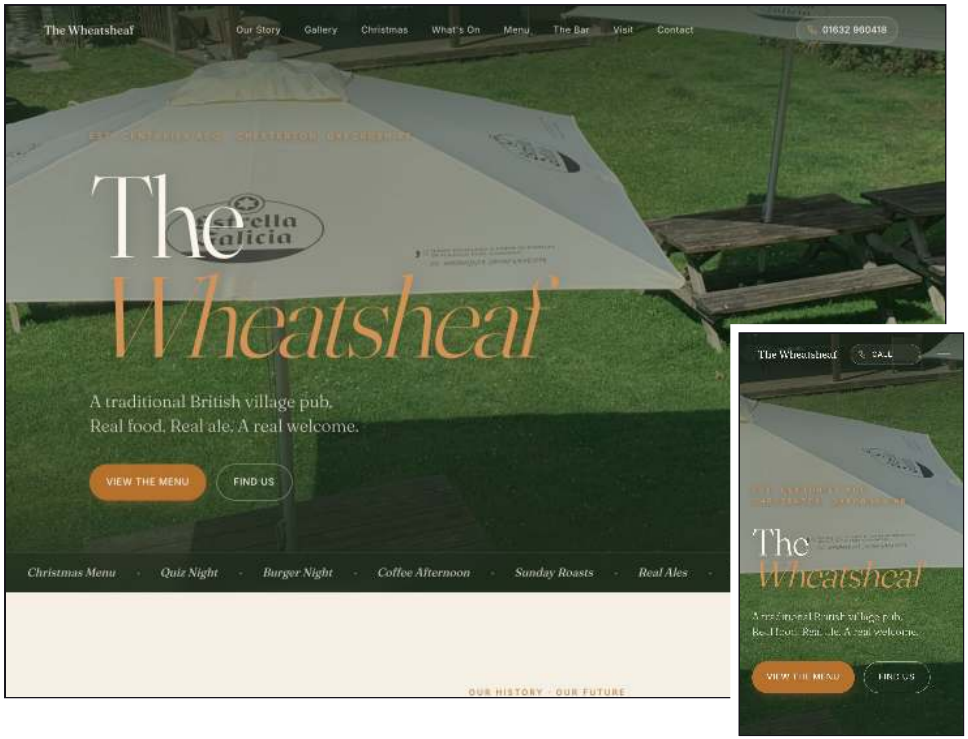

## Street artist and mural painter

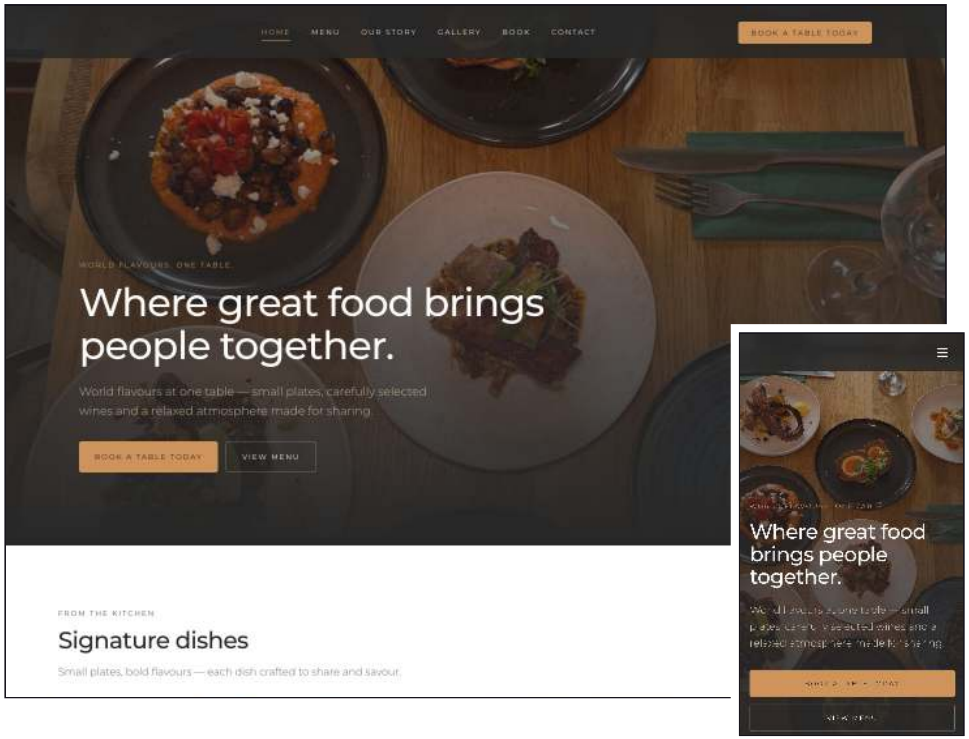

| | |
|---|---|
| Status | Built, domain being reconnected |
| Built | March 2026 |
| Where | Midlands |

Murals, signs, canvases and live painting at events, with a commission request and a shop.

Sell to

**Sign writers, decorators and creative trades who sell on their portfolio.**

# L01

## Village pub

| | |
|---|---|
| Status | Live on the client's domain |
| Built | May 2026 |
| Where | Oxfordshire |

Menu, events, Christmas bookings, gallery and directions. The menu is real text on the page, so Google can read it and it opens on any phone.

Sell to

**Pubs whose menu is a PDF or a photo on Facebook.**

# L02

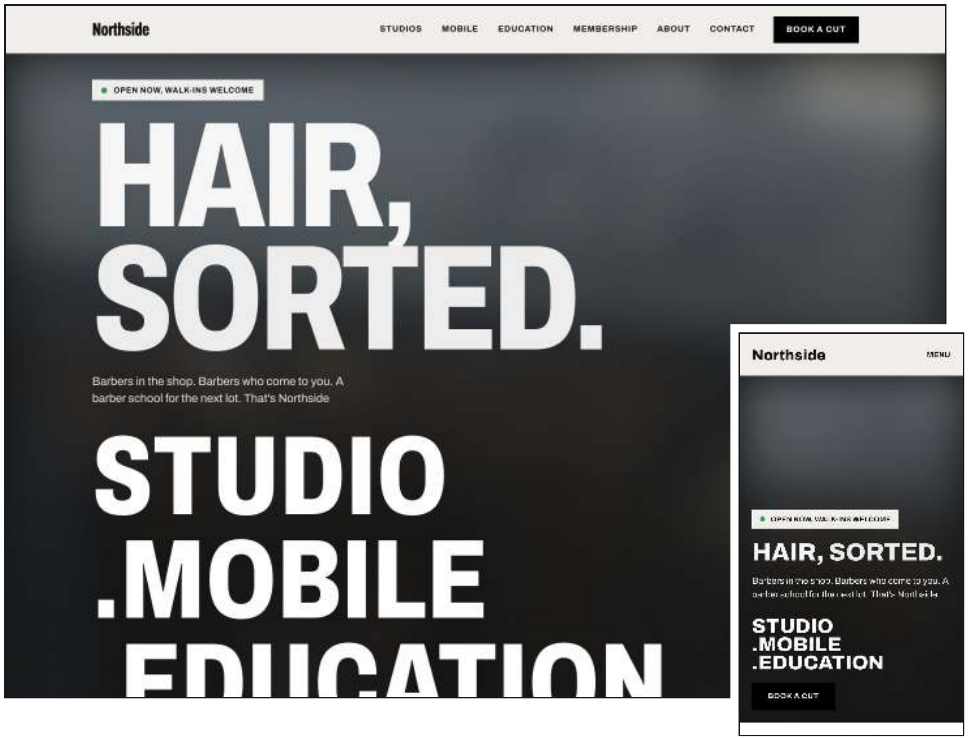

## Restaurant and wine bar

| | |
|---|---|
| Status | Live on the client's domain |
| Built | July 2026 |
| Where | Hampshire |

Small plates and wine, with the menu, the story, a gallery and a table booking button on every screen.

Sell to

**Independent restaurants paying a booking platform for customers who already know their name.**

# L03

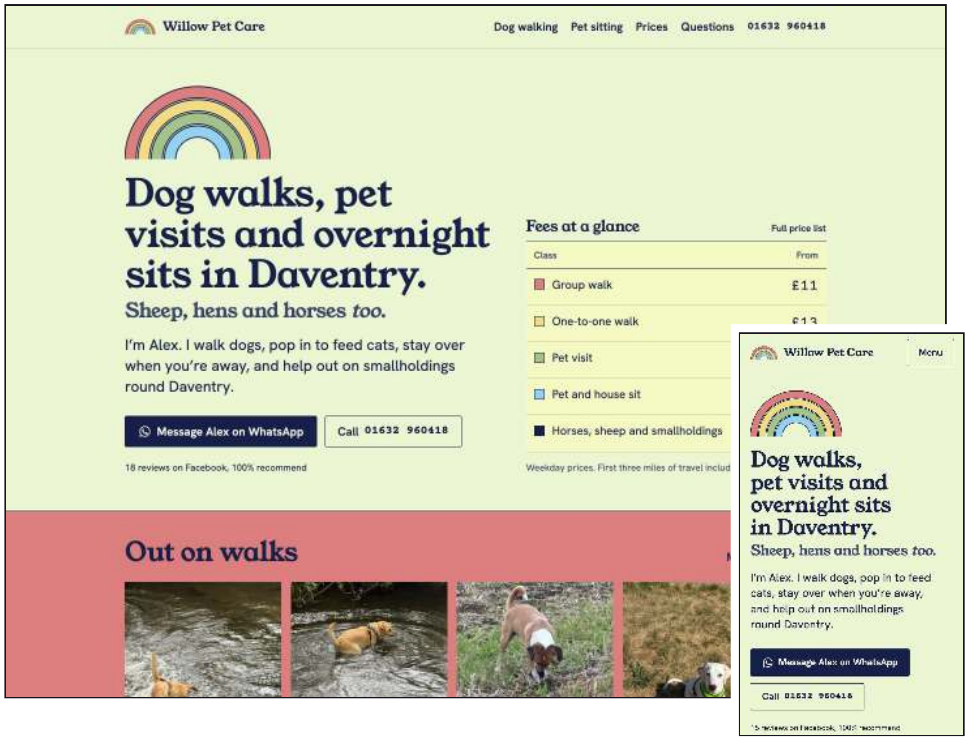

## Barbershop, mobile barbers and barber school

| | |
|---|---|
| Status | Live, moving to its own domain |
| Built | September 2026 |
| Where | East Sussex |

One brand covering the shop, barbers who come to you and a school for new barbers. Behind it, the owner has a back office that imports bookings, tracks each barber's takings and drafts their invoices.

Sell to

**Salons, barbers and studios with more than one line of business.**

# L04

## Dog walking and pet sitting

| | |
|---|---|
| Status | Live on the client's domain |
| Built | November 2026 |
| Where | Northamptonshire |

A one-person business. Prices sit in a table on the first screen with WhatsApp and call buttons underneath, next to the Facebook review count.

Sell to

**Sole traders who answer the same "how much?" message every day.**

# S01
# Getting found on Google and named by AI

SEO gets a business into Google and Bing. AEO (answer engine optimisation) gets it named when someone asks ChatGPT, Google's AI Overview, Perplexity or Claude for a recommendation. Every W and L site comes with the SEO work. AEO can also be sold on its own to a business that keeps its current site.

| | |
|---|---|
| **Crawl rules** | Google, Bing and the AI search tools are let in by name. |
| **Sitemap** | Every page listed and submitted to Google and Bing. |
| **Details** | Name, area, hours and services marked up for search engines. |
| **Titles** | A title and description on each page, written for the searches customers make. |
| **Listings** | Google Business Profile and Bing Places filled in properly. |
| **Mentions** | A plan for reviews and mentions on the sites AI tools read when they recommend a firm. |

Real result · W06, the bathroom installer · Google, searched from Milton Keynes, November 2026

**1st** In Google's map results, searched from Milton Keynes. Rated 5.0 from 3 Google reviews.

**1st** On Google for the firm's name and town, with Google's AI Overview describing it in the words from our site.

Google and ChatGPT results change, so we promise the work and show the before and after.

**The free check you can offer**

We search the prospect's trade and town on Google and in ChatGPT and show them who gets named. It is free for them.

**Questions to open with**

1. Have you ever asked ChatGPT to recommend someone in your trade, in your town?
2. Who set up your Google Business Profile, and when did anyone last update it?

# CRMs and systems that run a business

We build the system around the way a business already runs: its stages, its reports, its invoices and its booking apps. Then we connect it to the tools it can't drop, such as Xero, Stripe, Outlook, Google Calendar, Aircall and WhatsApp.

### How to find the brief

Ask the owner to walk you from the moment a lead comes in to the moment they get paid. Write down every place the details get copied by hand. That list goes to Shift with the lead.

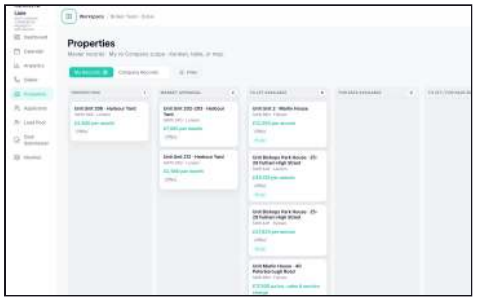

### Who to look for

Businesses running on spreadsheets and WhatsApp groups, owners who type the same details into two places, and teams paying for a big CRM that half the staff won't open. Estate and letting agents, recruiters, accountants, brokers, studios, multi-site groups and any team that makes sales calls.

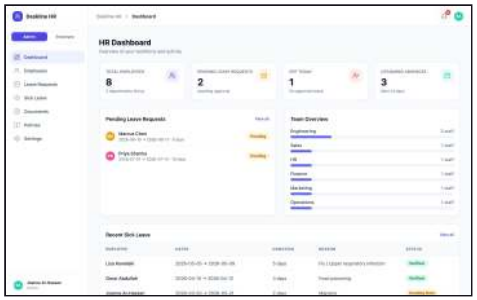

### Questions to open with

1. **Where do your leads live right now?**
2. **How do you know who has chased whom, and when?**
3. **What do you type into two different systems every week?**
4. **Which report do you still build by hand at the end of the month?**

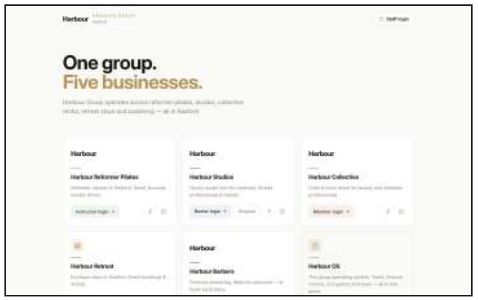

### In this section

Operating system for a group of five businesses

C04
Practice system for an accountancy firm

# C01

## Sales CRM for agents and brokers

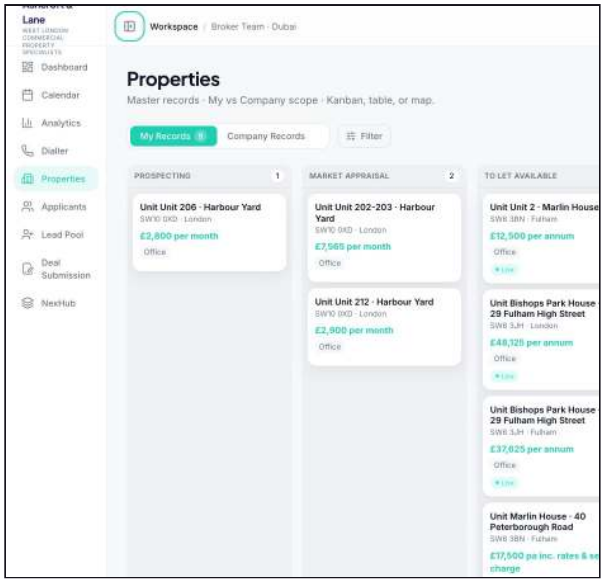

| | |
|---|---|
| Status | Demo with sample data |
| Built | June 2026 |
| Where | Built for estate agents |

Built first for property agencies. The same shape works for any business that moves people through stages, such as lettings, recruitment, brokers or builders chasing quotes.

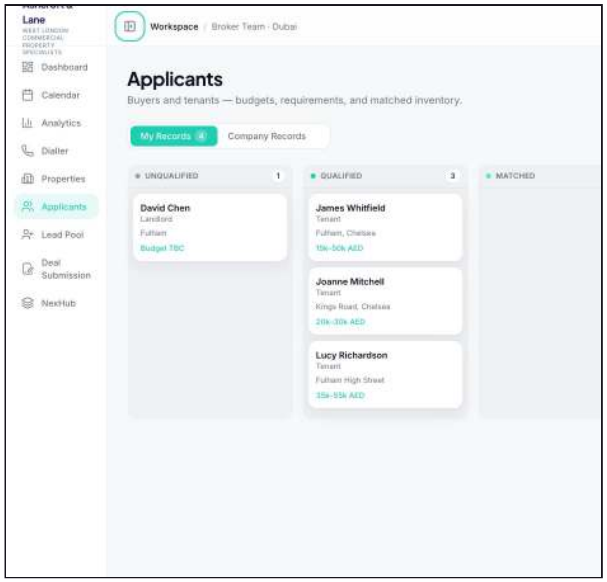

| | |
|---|---|
| **Leads in** | Website and property-portal enquiries land in the pipeline on their own. |
| **Pipeline** | Properties and applicants on boards, dragged from stage to stage. Table and map views too. |
| **Morning view** | Follow-ups due, leads to qualify and today's viewings. |
| **Calendar** | Shared team diary linked to Outlook and Google. |
| **Calls** | Click-to-call dialler that logs every call. |
| **Deals** | Deal submission with documents and each agent's commission split. |

Sell to

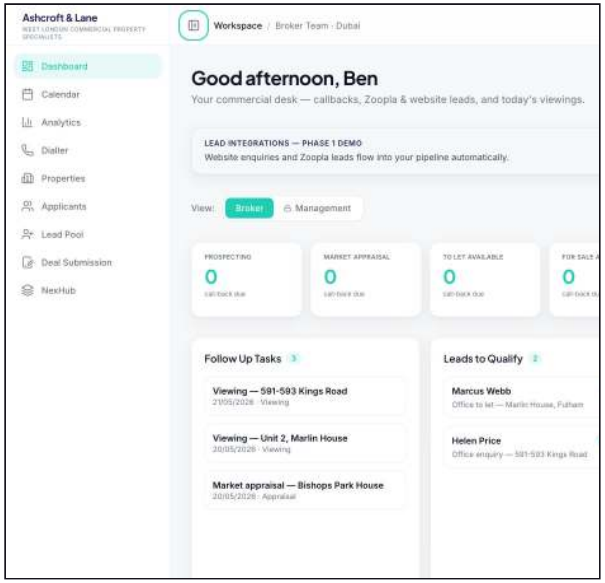

**Estate and letting agents, recruiters and mortgage brokers.**

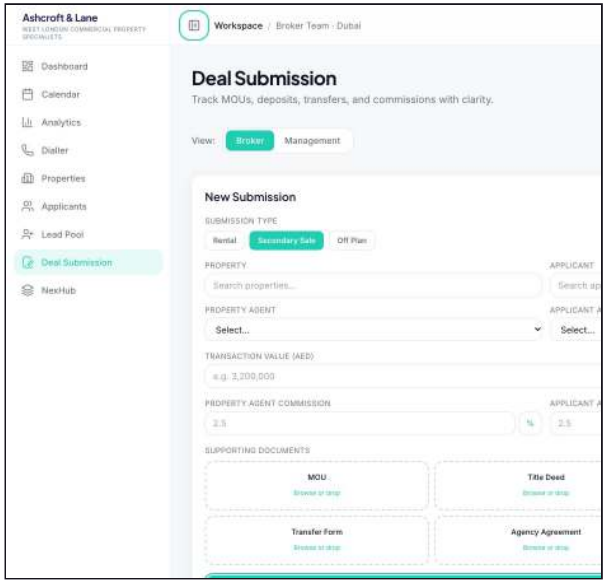

Properties by stage

Applicants by stage

Morning view

Deal submission

# C02
## Back-office portals

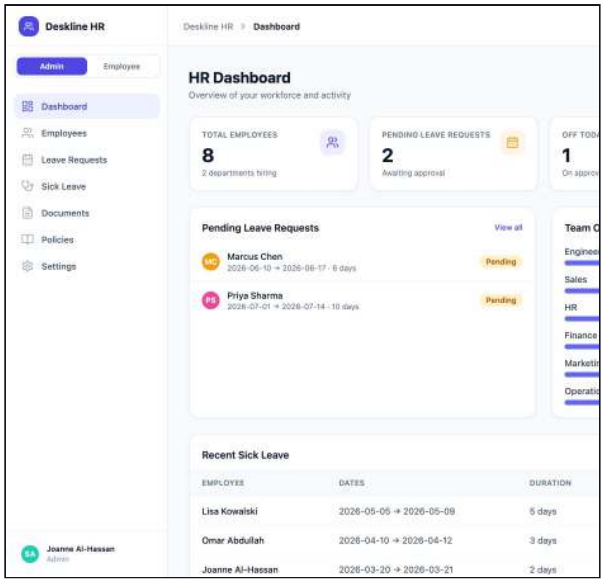

| | |
|---|---|
| Status | Demo with sample data |
| Built | May 2026 |
| Where | Made for Dubai firms, so figures show in AED |

Four portals, each replacing a spreadsheet and a folder of emails.

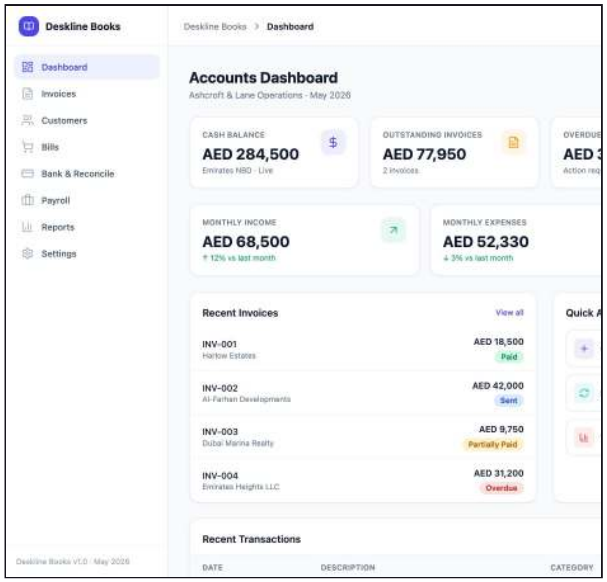

| | |
|---|---|
| **HR** | Staff records, leave and sickness approvals, documents and policies, with an employee view. |
| **Accounts** | Invoices, bills, bank reconciliation, payroll and reports. |
| **Mortgages** | Leads, cases, bank submissions, calculators, compliance and commission. |
| **Conveyancing** | Every sale by stage, with tasks, documents, transfer appointments and compliance. |

Sell to

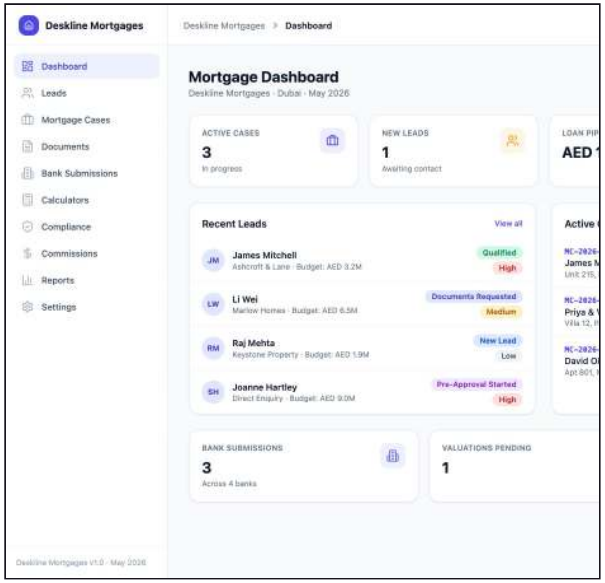

**Firms of 5 to 50 staff who have outgrown spreadsheets and don't want four separate subscriptions.**

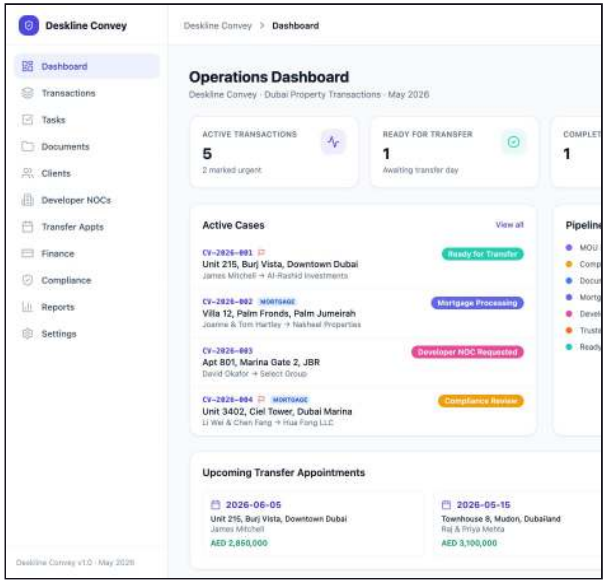

HR

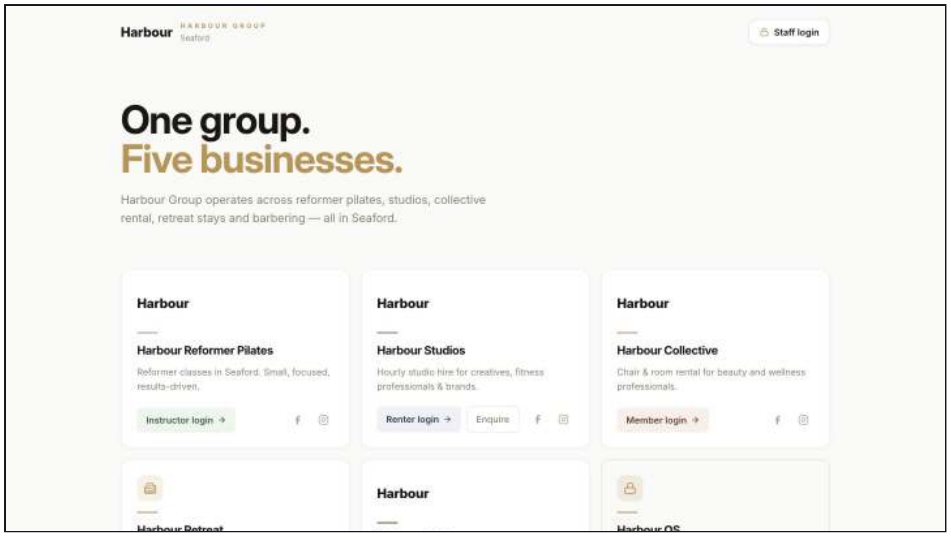

Accounts

Mortgages

Conveyancing

# C03

## Operating system for a group of five businesses

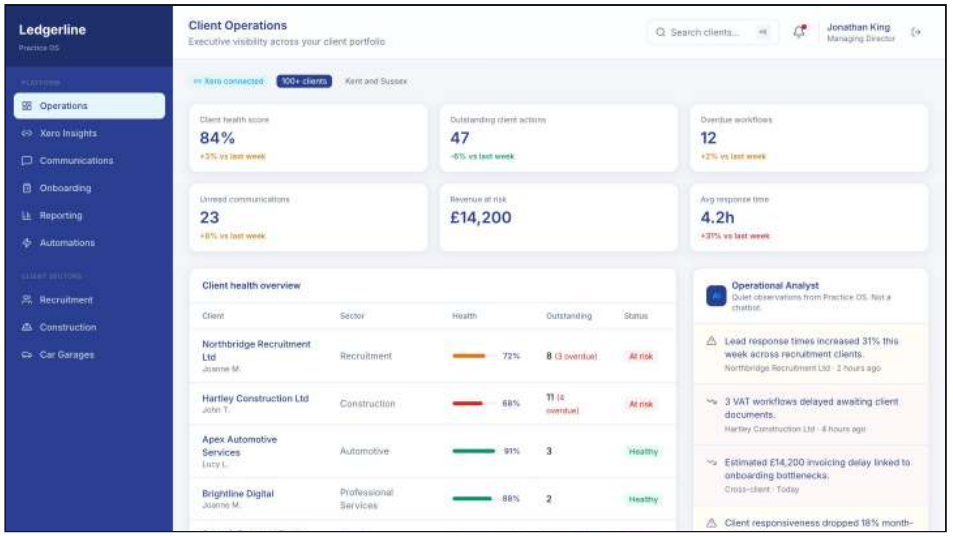

| | |
|---|---|
| Status | Built |
| Built | May 2026 |
| Where | East Sussex |

One owner runs a pilates studio, studio hire, chair rental, holiday lets and a barbershop from one admin system, with login portals for instructors, renters and barbers.

| | |
|---|---|
| **Bookings** | Synced every night from the pilates booking app and Airbnb, and imported from the barbers' booking app. |
| **Money** | Occupancy and lost revenue per room, renter and supplier invoices, Stripe payment links. |
| **Barbers** | Invoices worked out from bookings and each barber's split, emailed every Monday. |
| **Automations** | If-this-then-that rules with email templates, and KPIs for each brand. |

Sell to

**Owners running several small businesses and stitching them together by hand.**

# C04

## Practice system for an accountancy firm

| | |
|---|---|
| Status | Demo with sample data |
| Built | February 2026 |
| Where | Works alongside Xero |

Every client gets a health score built from outstanding actions, overdue workflows, unread messages and revenue at risk. A feed of plain-English warnings sits beside it, for example "VAT workflows delayed awaiting client documents".

| | |
|---|---|
| **Portfolio** | Client health across every client, by sector. |
| **Messages** | WhatsApp and email next to the client record. |
| **Onboarding** | Workflows that send the chasers for you. |

Sell to

**Accountants, bookkeepers and outsourced finance directors with 50 or more clients.**

# C05
## Cold-calling lead engine

| | |
|---|---|
| Status | In use, including by Shift's own callers |
| Built | June 2026 |
| Where | Also built for a partner consultancy |

A manager imports a lead list, the engine scores and queues it, and each caller presses one button to get the next business to ring. It is also where you log the leads you bring to Shift.

| | |
|---|---|
| **Call mode** | The next lead and their website on screen, one-tap dial, outcome logged. |
| **Lead lists** | Imported from Apollo and Apify exports, scored on how likely they are to buy. |
| **Leaderboard** | Dials, connections, meetings booked and estimated commission per caller. |
| **Follow-up** | Callbacks, calendar, Aircall recordings and transcripts, and AI-drafted emails and WhatsApp messages. |

Sell to

**Any business with two or more people making outbound sales calls: agencies, recruiters, solar, insurance and B2B services.**

# C06
## Sales and delivery platform

| | |
|---|---|
| Status | Built |
| Built | June 2026 |
| Where | For a software company |

One system that follows each client from lead to sale, onboarding, delivery, retainer and renewal. It covers the CRM, affiliates and their commissions, project delivery and finance, with staff invites and roles.

Sell to

**Agencies and service firms that sell, deliver and then bill a monthly retainer.**

# A01

## Tender estimating for trade contractors

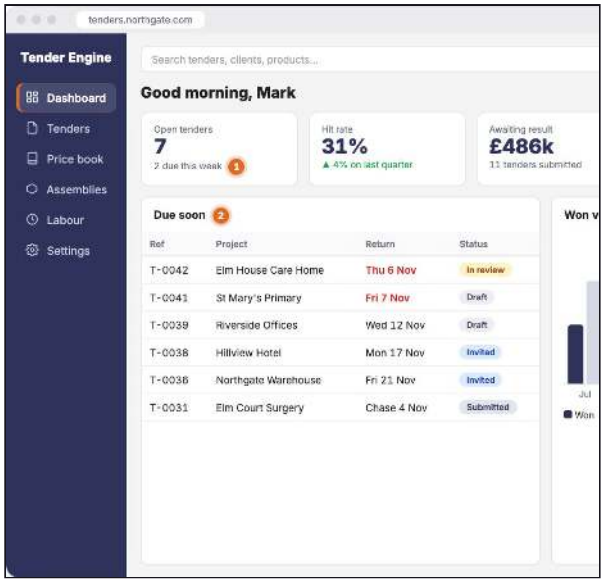

| | |
|---|---|
| Status | Live, invite-only |
| Built | November 2026 |
| Where | Built for a commercial heating contractor |

The estimator drops in the whole tender pack. The app finds the pages that matter, pulls out the scope, prices every line from the firm's own price book and labour times, raises the questions to ask the client and checks a "commonly missed" list. Then it exports the tender.

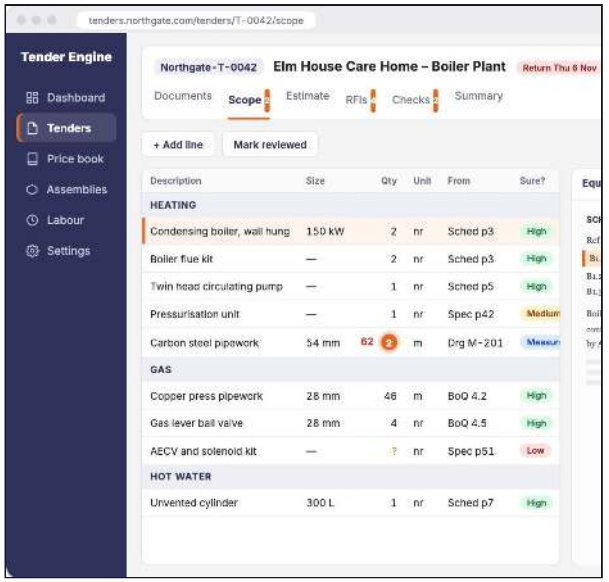

| | |
|---|---|
| **Checkable** | AI only reads the documents. Plain code does every sum, so the figures can be checked line by line. |
| **Traceable** | Every quantity links back to the page it came from. |
| **Fallback** | It still prices a tender with AI switched off, from Excel and drawing take-offs. |
| **Private** | Invite-only logins keep the price book inside the firm. |

Sell to

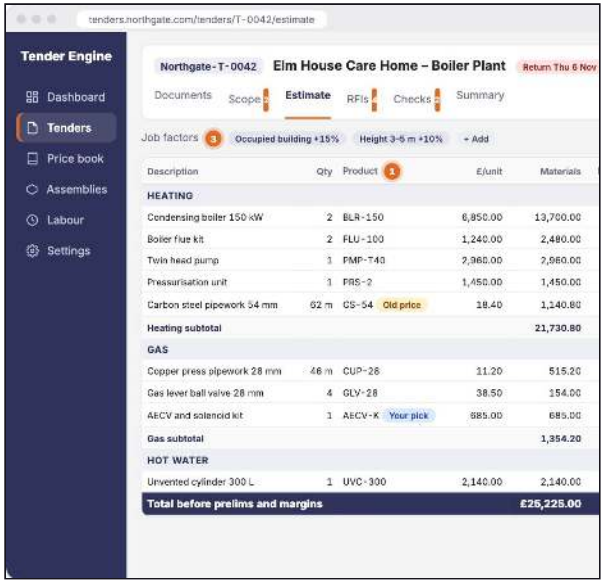

**M&E, plumbing, heating, electrical and fit-out contractors whose estimators spend days on each tender.**

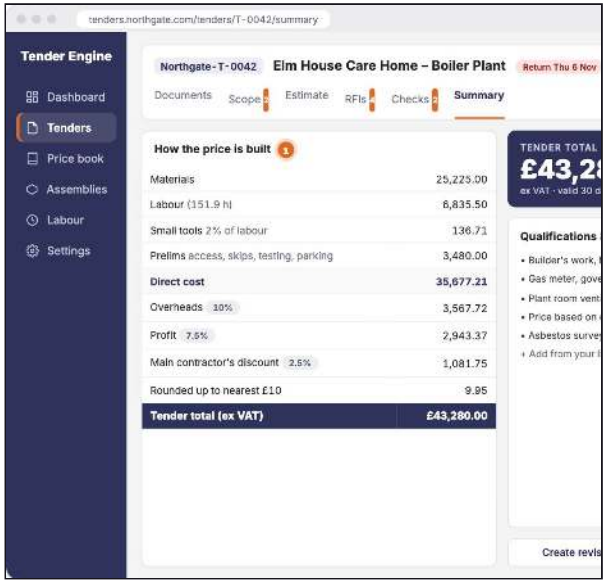

Tender list and win rate

Scope, linked to the source page

Priced from their own price book

Tender total and exclusions

# A02

## Anti-money-laundering checks for accountants

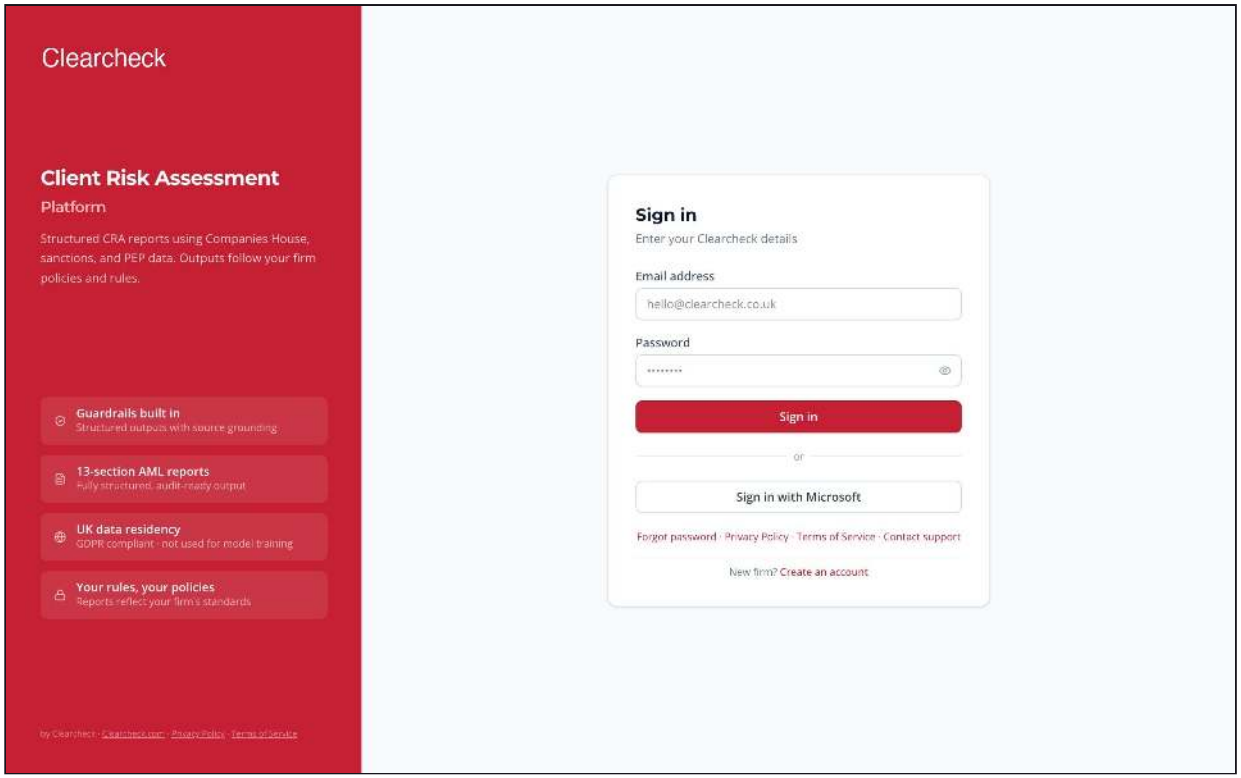

| | |
|---|---|
| Status | Live, white-labelled for a CRM provider |
| Built | March 2026 |
| Where | UK and EU data only |

Every UK accountant has to risk-assess new clients. The firm enters a company or a person, and the platform does the research and writes the report.

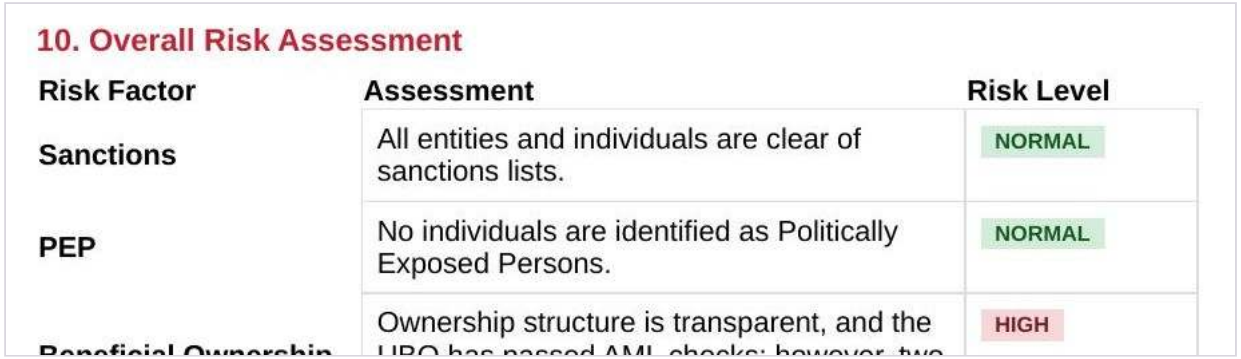

| | |
|---|---|
| **Research** | Companies House record, directors and owners, UK sanctions, politically exposed persons and press searches. |
| **Report** | 13 sections with a risk rating and recommended actions, following the firm's own policy. |
| **Delivery** | Checked, then returned as a PDF and sent straight into the firm's CRM. |
| **Data** | Stays in the UK and EU, and is never used to train AI models. |

Sell to

**Accountants, bookkeepers, solicitors and estate agents, who all have AML duties, and software firms that want to sell it under their own name.**

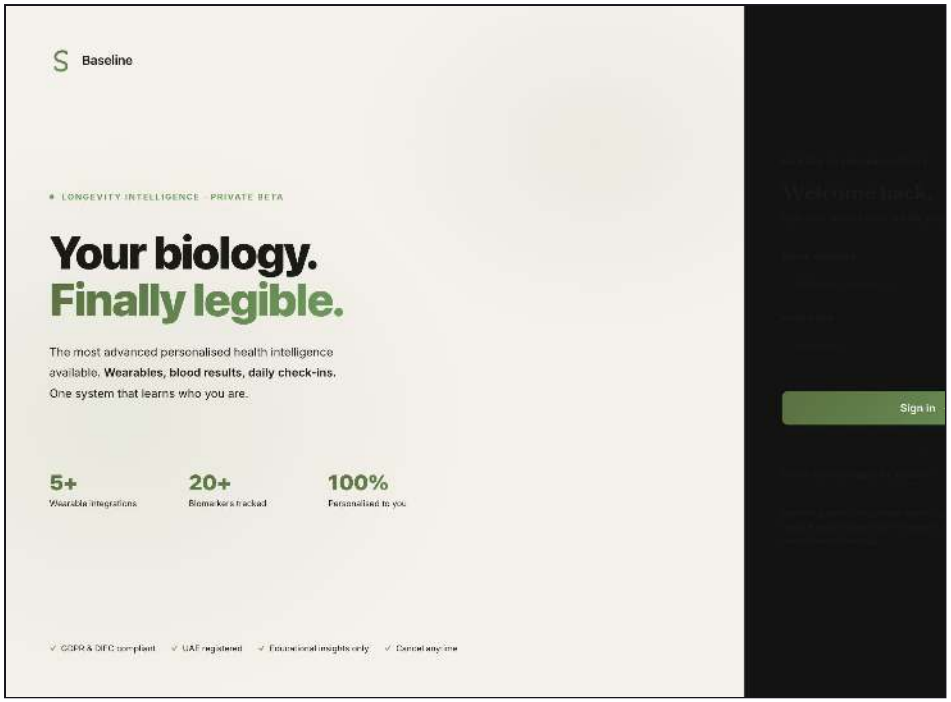

Sign-in, including Microsoft accounts

10. Overall Risk Assessment

| Risk Factor | Assessment | Risk Level |
|---|---|---|
| Sanctions | All entities and individuals are clear of sanctions lists. | NORMAL |
| PEP | No individuals are identified as Politically Exposed Persons. | NORMAL |
| Beneficial Ownership | Ownership structure is transparent, and the UBO has passed AML checks; however, two | HIGH |

Part of a finished report

# A03

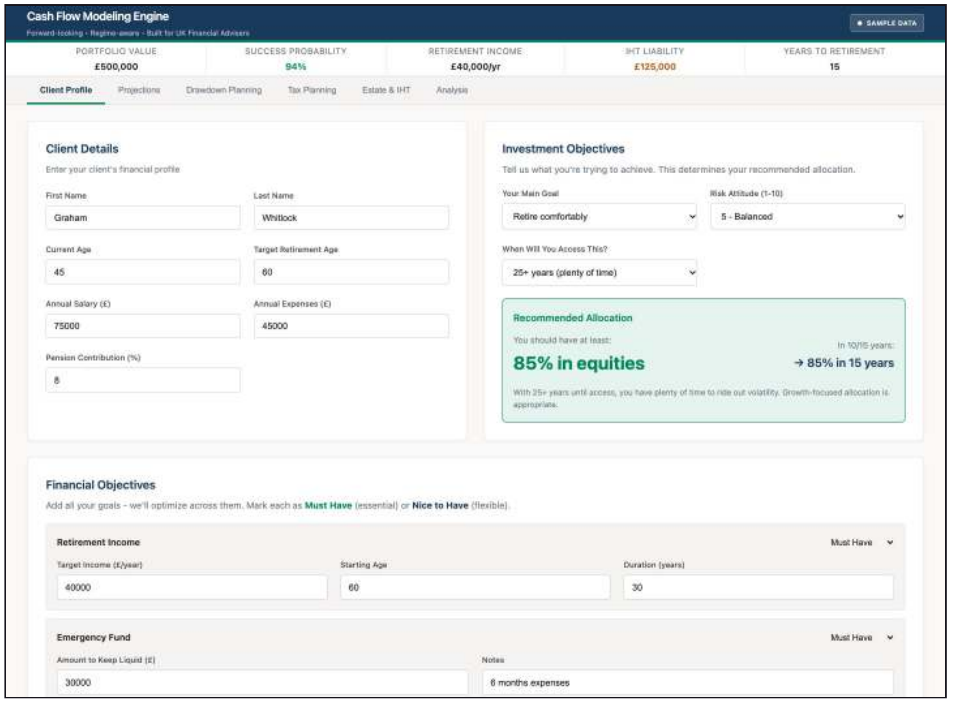

## Personal health platform

| | |
|---|---|
| Status | Live, private beta |
| Built | April 2026 |
| Where | Web app |

Users upload blood test results, connect their wearables and do a short daily check-in. The platform learns what is normal for each person and explains their numbers in plain English. Results are explained for education, and diagnosis stays with the user's doctor.

Sell to

**Clinics, personal trainers, gyms and wellness brands that want an app under their own name.**

# A04

## Cash-flow planner for financial advisers

| | |
|---|---|
| Status | Built |
| Built | January 2026 |
| Where | UK tax wrappers |

It models a client's plan against today's market prices and UK tax wrappers, then answers the two questions clients ask: how fragile is my plan, and is now a bad time to retire?

Sell to

**Independent financial advisers and wealth managers.**

# T01
## AI trading platform

| | |
|---|---|
| Status | Running, paper trading on live markets |
| Built | July 2026 |
| Where | Crypto markets |

Strategies are built in a research lab, replayed bar by bar in a backtester, then run on live market feeds with simulated money before anything goes near an exchange.

| | |
|---|---|
| **Lab** | Build, version and compare strategies, and export reports. |
| **Backtest** | Replay any strategy with every trade and its performance. |
| **Paper** | Live charts with entries and exits, open positions and a watchlist across strategies. |
| **Safety** | A strategy stops itself if its data stops matching what it was tested on. |

Sell to

**Prop trading firms, funds and experienced traders who want their own strategy built, tested and automated.**

Shift builds and runs the technology. We don't give investment advice, and nobody should promise returns.

Paper trading: live chart with entries and exits, and the strategy watchlist

Backtest screen: pick a strategy and replay it bar by bar

# From introduction to signed project

Your part ends when the lead is logged. Shift runs the check, the discovery call and the quote, and you watch it move in the Lead Engine.

| Step | Who | What happens |
|---|---|---|
| **Introduce** | You | Log the lead in your Lead Engine login, or email it to Jack. |
| **Free check or call** | Shift | The Google and ChatGPT check from S01, or a short call with the owner. |
| **Onboarding** | The business | A short questionnaire at shiftaitech.com/onboarding. |
| **Discovery and proposal** | Shift | Shift walks through how the business works today, then sends a fixed scope and price. |
| **Build** | Shift | Shift builds, launches and supports it. The status updates in your login. |

### What to send with a lead

- The business name, the owner's name and the best number to reach them.
- What they told you is wrong, in their words.
- The codes you showed them, and which one they reacted to.
- Anything they mentioned about timing or budget.

### Good to know

- The prospect doesn't need to understand the technology. Shift explains it on the call.
- If you're unsure which code fits, send the lead anyway and say what you saw.
- Shift can run a call with you and the prospect together.

Leads and questions
